

xTablet™ T8400

The xTablet is powerful enough to survive the rough handling of your sales and delivery force, while allowing you to perform brewery based initiatives and becoming more effective dealing with your customers. It's a quantum leap in sales support capabilities!

- Brewery certified for Anheuser-Busch's Seamless Selling efforts with Mobility
- Ideally suited for pre-sell & driver-sell (peddle) routes
- Lower total cost of ownership (TCO) than consumer grade computers
- Rugged design to survive rough and extreme handling by road warriors
- High performance with 640MB RAM, to effectively run sales and shelf set software
- Advanced enterprise functionality and ease of use with Windows XP Tablet PC Edition
- Excellent mobile worker accessories and integrated wireless communications

Brewery Certified

As part of Anheuser-Busch's Seamless Selling efforts, their Mobility team tests and recommends a variety of hardware devices that will meet different wholesaler needs. The MobileDemand xTablet is a ruggedized device that is certified to work with AB Mobility. The xTablet has also received rave reviews by installed wholesaler customers and route sales personnel. It is the device of choice for wholesalers who expect durability and ruggedness in their next generation, high performance mobile computers (handhelds).

Solid Fit for Pre-Sell and Driver-Sell

Wholesalers expect nothing less than high achievement out of their sales operations. The xTablet is the sales automation tool that enables that high performance. Your sales staff will easily manage standard sales activities, such as taking inventory, tracking order history, payments, order taking, and collecting survey and competitive data.

They will also take advantage of potent marketing practices by making professional looking PowerPoint sales presentations to customers and demonstrate full motion videos of brewery commercials or other marketing videos. Your sales people can also track and manage shelf sets with the xTablet on their own!

Lower Total Cost of Ownership

Recent studies have shown that rugged computers result in a lower total cost of ownership when compared to their consumer counterparts. The rugged xTablet has been built to withstand the wear and tear of the distributing industry. This durability translates into a computer that still offers

high power and extensive functionality, with less long term maintenance costs than its competitors.

Latest Generation Mobile Technology

The Intel Pentium III, 866MHz processor combined with the 640MB of RAM, provides the horsepower needed for your software applications. The Windows XP Tablet PC Edition offers the latest security and scalable networking features of Windows XP Professional with tablet / touch specific capabilities.

Supports Your Software – Today and Tomorrow

The xTablet runs the sales automation software as would any standard desktop or laptop computer. It not only supports the expected sales software, but also the powerful shelf set software, spreadsheets, presentations and video. Your sales staff can take notes or do e-mail with the Tablet PC ink tools or on-screen keyboards.

Built for Field Use

The xTablet is part of a system designed for the ease of your mobile workers – mid-sized and durability built in with die cast magnesium housing and shock mounted hard disk drive. The xTablet system includes a variety of accessories to fulfill your specific needs, such as vehicle cradle, numeric keypad, second battery, wireless and memory options, carrying case, auto adapters and even rugged mobile printers – mounted in the cab of your tractors.

Integrated Wireless Communication

The xTablet offers multiple, simultaneous wireless connectivity to the enterprise through industry standard wireless LAN (802.11b, 2.4GHz), cell phone connection, and Bluetooth to printers.

xTablet™ T8400 Specification Highlights

Physical and Environmental Characteristics

Dimensions:	10.6" W x 7.2" H x 1.65" D (270 mm W x 183 mm H x 42 mm D)
Display Diagonal:	8.4" (213 mm) diagonal, 6.75" W x 5.0" H (171 mm W x 127 mm H)
Weight:	3.7 lb. (1.7 kg)
Sealing:	IP 54
Operating Temperature:	-4° F to +122° F (-20° C to +50° C)
Storage Temperature:	-22° F to +140° F (-30° C to +60° C)
Humidity:	5% - 95% non-condensing

Performance Characteristics

Processor:	Intel PIII Mobile Ultra Low Voltage, 866MHz
System Memory:	256 - 640 MB SDRAM
Hard Drive:	Shock Mounted, 2.5 inch Hard Disk (internal, removable), 40GB
Operating System / Software	Windows XP Tablet PC Edition (superset of Windows XP Professional edition)
Application Development:	Standard desktop application development tools
Display:	800 (W) x 600 (H) (SVGA) Color TFT Outdoor Transmissive LCD with Digitizer Touch Screen 48MB Video RAM
Keyboard:	8 Keys: Enter, Up/Down Navigation, Escape, Security, Rotate Display, Function Key, Suspend/Power
System Expansion:	Compact Flash Type II Slot, PC Card Slot Type II-Card Bus 2.1 (external access), RJ-11 integrated fax/modem, RJ-45 10BaseT 10/100 Ethernet, 2 USB 2.0, 26 pin docking connector
Power and Battery System:	3200 mAh Li-ION main battery pack, additional 3200 mAh secondary battery (optional)
LED:	4 color LEDs for alarm notification, power/charger indicator, hard disk activity, wireless
Audio:	One mono speaker, microphone-in and speaker-out
USB:	Two USB ports, support USB 2.0 Compliant Function
Docking Station:	Video/CRT, USB (2), Power Jack, RJ-45 Ethernet LAN on unit

Network Characteristics

Wireless:	802.11b (11 Mbps) 2.4 GHz, Bluetooth (Class II, optional)
Remote Modem (WAN):	Optional integrated CDMA1-X1 (Class B) or GPRS(GSM)

Regulatory Approvals

FCC Class B, CE

Accessories

Vehicle Cradle, Numeric Keypad, Desk Stand, Protective Carrying Case, Stylus, AC Adapter/Charger, Auto Adapter, Screen Protector
