

# The First Truly Mobile 3D Box Dimensioning System

xDIM Mobile is an NTEP Certified, innovative cloud-based mobile dimensioning system designed to help companies increase efficiencies, reduce costs, and optimize space with patented software that quickly and accurately determines box dimensions from anywhere. The ability to measure boxes wherever they are enables a more mobile, agile workforce and replaces costly and cumbersome fixed measurement equipment.

A fully rugged tablet from MobileDemand is equipped with Intel® RealSense™ depth camera technology for intuitive point and capture dimensioning, producing measurements in seconds. Information is transferred to xDIM Insight, a cloud-based, user-friendly analytics dashboard. Reliable data is then put to work, significantly enhancing slotting, reracking, and Ti-Hi pallet configurations.

Legal for Trade

xDIM has undergone a stringent series of tests to ensure it is sufficiently accurate where product is sold by weight to earn the National Type Evaluation Program (NTEP) Certification, making it Legal for Trade.

(Certificate Number: 21-041)

## Increased mobility and agility

- Quickly measure packages wherever they are instead of moving bulky boxes to a stationary scanner
- Simply scan with the tablet that moves with you throughout the day

## Improve space and time efficiencies

- Enhance slotting in the warehouse
- Speed up re-racking projects
- Improve Ti-Hi pallet configuration

## Increase revenue while reducing costs

- Establish cost for services or hire on the basis of measurement
- Reduce shipping chargebacks
- Reduce volume dimension scanning investment costs

## Modern application, API & cloud dashboard

- Obtain greater visibility into operational insights
- View results in real time from a cloud-based analytics dashboard
- Easily collaborate with value chain partners

LOAD PLANNING

RERACKING AND SLOTTING

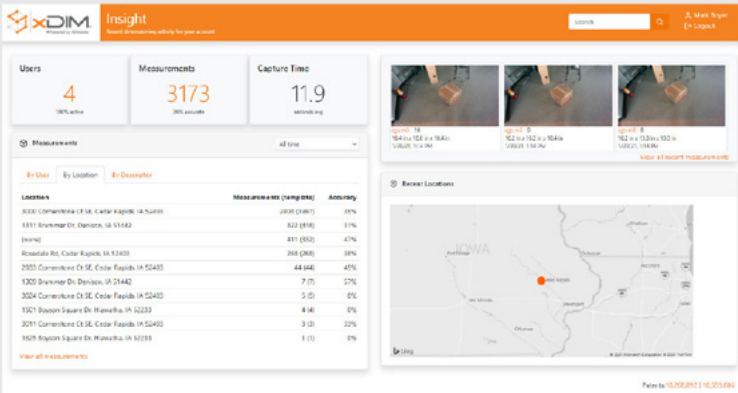

SHIPPING

OPERATIONS

A growing number of industries benefit from the power of xDIM Mobile software including transportation, supply chain management, logistics, shipping, warehousing and more.

## xDIM Insight

xDIM Insight works in unison with xDIM Mobile for complete visibility to all measurements captured within the organization. The patented technology seamlessly integrates with existing product data measurement systems, warehouse management systems, enterprise resource planning software, and other resource management platforms to efficiently store and manage data.

## 3D Camera connectivity

Select MobileDemand rugged tablets and cases are equipped with Intel® RealSense™ depth camera technology for intuitive point and capture dimensioning. We provide three camera options, each with its own unique characteristics to serve a variety of 3D applications.

## Technologies that move business

For optimal performance, xDIM Mobile is sold as a bundled offering with MobileDemand rugged xTablets as well as Microsoft® Designed for Surface® Certified xCases for Surface series of tablets.

Coupling a pioneering dimensioning software with an easy to hold, proven rugged tablet, MobileDemand and 4DMobile are driving the future of mobile productivity.
